

1

The distinctive curved roof creates a striking impression

2

3m canopy provides a covered balcony or terrace

3

Multiple levels possible: single, two or three storey

Product

The Alu Globe is a modern variation of the original Alu Hall. It is an aluminum clear span structure with a distinctive curved roof. The latest design offers smart accommodation for any event. The structure can be constructed with multi-level floors, making the most of available floor space and allowing visitors to take in the best views at the location. The extended roof canopy provides a covered balcony or terrace.

Design

The Alu Globe is supplied with vertical, rigid PVC sidewall panels or glass panels, and there is also the option of sliding fabric curtain walls. The roof canopy can be supplied in opaque (non-permeable to light) 80%, translucent or fully transparent versions. The Neptunus rain gutter tensioning system ensures that the roof canopy stays taut at all times and rainwater is drained in concealed downpipes. The Alu Globe is fitted with the Neptunus raised cassette floor as standard and the internal finish has a stylish modern feel. With multi-floor options an external, cantilevered balcony can be fitted, 2m wide or 4m wide with support legs.

Features

The Alu Globe is available in widths of 16, 20 or 28 metres and has a sidewall height of 3 metres. The length is unlimited and can be increased in increments of 5 metres. The Alu Globe can be connected to structures of the same type as well as other Neptunus designs and can be equipped with internal finishes to suit your requirements. For example, open atriums, staircases, passenger lifts, balconies and terraces. Externally graphic branding and vinyls can be provided.

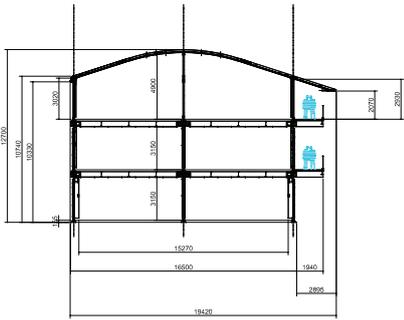

Applications

The Alu Globe upgraded features make it an attractive proposition for corporate hospitality, product launches, exhibitions, fashion shows and culinary events. When space is at a premium or a view is picturesque or critical a multi-storey structure is the ideal choice.
